EXPERIENCE

Tour Media Coordinator · **Yeezy** Jan 2025 – Present

- Coordinate photographers, videographers, and media pages across Instagram, TikTok, X, and Facebook to deliver high-visibility digital campaigns for Ye's world tour.
- Produce promotional graphics and fast-turnaround video creative in Adobe Premiere Pro and CapCut, adapting assets for different platforms, formats, and campaign moments.
- Plan and execute pre-show content rollouts tied to audience behavior and ticket-sales goals, generating 20-30M+ views per show through coordinated cross-platform campaigns.

YZY App Developer & Marketing/Media Lead · **Yeezy** Dec 2023 – June 2024

- Led frontend UI design and feature planning for the YZY mobile app prototype, translating brand direction into clear, interactive product experiences.
- Built interactive prototypes with Swift and frontend frameworks for executive product pitches and collaborated with creative teams from concept through presentation.
- Designed campaign banners and social assets and directed influencer outreach for the Vultures album launch, connecting product design with digital advertising strategy.

Visual Brand Designer & Content Strategist · **Self-Employed** Oct 2022 – Present

- Develop visual identities, reusable content systems, and digital campaign assets for 20+ clients, including LA Apparel and Yeezy, reaching audiences across platforms with 3M+ combined followers.
- Translate client goals into production-ready creative using Figma, Illustrator, Photoshop, Premiere Pro, and CapCut while managing multiple projects and deadlines.
- Use performance insights and platform trends to refine creative, strengthen engagement, and consistently drive viral reach.

Web Developer · **Azerty Studio** June 2024 – Aug 2024

- Built and maintained responsive web platforms for creative and e-commerce clients using JavaScript, HTML/CSS, Node.js, Express, MySQL, and REST API integrations.
- Partnered with designers to translate visual concepts into responsive frontend experiences and implement ongoing website content updates.

PROJECTS

Personal Finance Tracker · Full Stack Web App May 2025

- Designed and built a full-stack app featuring income/expense tracking, budget planning, and financial report visualizations. React frontend (Netlify), Express API (Render), MySQL backend.

Resume Builder · Web Application Feb 2025

- LaTeX resume generator using the Overleaf CLSI API and Node.js. Dockerized the CLSI service; enabled PDF export with customizable templates.

Real Estate Price Predictor · Machine Learning Mar 2025

- Trained and tuned MLP and XGBoost models on 25K+ Milwaukee housing records. Achieved R^2 of 0.72 after feature engineering, data cleaning, and outlier handling.

EDUCATION

B.S. in Computer Science · Illinois Institute of Technology Aug 2024 – May 2026

A.A. in Computer Science · Harper College Aug 2022 – May 2024
